15. Supplementary Notes

16. Abstract

This report furnishes airport activity of the Certificated Route Air Carriers. Included in the data contained in Table 6 are passenger enplanements, tons of enplaned freight, express, and mail. Both scheduled and non-scheduled service, and domestic and international operations are included. These data are shown by airport and carrier. Table 7 includes departures by airport, carrier and type of operation, and type of aircraft.

17. Key Words
Passenger enplanements, departures, freight, express, mail, scheduled service, non-scheduled service, domestic, international

Airport Activity Statistics
of
Certificated Route Air Carriers

Issued Annually

12 Months Ending December 31, 1980

Prepared Jointly by

Civil Aeronautics Board

U.S. Department of Transportation
Federal Aviation Administration

Availability is unlimited. Document may be released to the
National Technical Information Service
Springfield, Virginia 22161, for sale to the public.

PREFACE

The Civil Aeronautics Board inaugurated in 1970 a revised air traffic and capacity data collection system for the certificated route air carriers. The airport activity data now reported by these air carriers to the Board under the revised traffic statistics reporting requirements differ in significant respects from those previously reported. The aircraft departure data are essentially the same but passenger originations and cargo tonnage originations are eliminated. Enplaned passengers continue to be reported, but the tons of cargo traffic loaded on board are on an enplaned rather than an originated basis. In addition, aircraft departures, enplaned passengers, and enplaned tons of cargo traffic are being reported for nonscheduled operations at online airports.

To accommodate the expanded airport activity data bank, computer reprogramming and reformating of the outputs was necessary. This revised publication now contains seven tables. The first five tabulations present summary data and include three tables showing activity at large, medium, and small air traffic hubs. The last two tables show detailed statistics by community and airport, including a presentation of total aircraft departures performed by specific aircraft types. The publication is no longer divided into separate parts for system operations, domestic operations, and international and territorial operations. With the exception of the three hub tables, each tabulation presents these operations separately, but grouped together, under the various levels of detail such as State, air carrier, or community. The air traffic hub tables show only system (total) operations at the large, medium and small hubs.

Another significant change in the presentation of airport activity data at communities and airports is that all air traffic hub classification computations are calculated upon the base of total enplaned revenue passengers in all services and all operations at communities within the 50 States, the District of Columbia, and all other U.S. areas as designated by the Federal Aviation Administration. This expands the previous base for calculation to include (1) Alaska and Hawaii, (2) communities in American Samoa, Caroline Islands, Guam Island, Johnston Island, Mariana Islands, Marshall Islands, Midway Island, Panama Canal Zone, Puerto Rico, Virgin Islands, and Wake Island, (3) helicopter operations, (4) nonscheduled enplanements, and (5) international operations at the communities within the 50 States, District of Columbia, and other U.S. areas.

The islands of Midway, Wake, and the Panama Canal Zone did not receive scheduled service during the 12 months ending December 31, 1980.

INTRODUCTION

This edition presents the volume of revenue passenger, freight, express, and mail traffic handled by the Nation's certificated route air carriers at each airport served by these airlines during the 12 months ending December 31, 1980. In addition, a presentation of aircraft departures is shown including detail by aircraft type for total departures performed in scheduled, nonscheduled, and all services.

Certificated route air carriers include the trunk, local service, helicopter, intra-Alaska, intra-Hawaii, all-cargo, and other route carriers holding Certificates of Public Convenience and Necessity issued by the Civil Aeronautics Board (CAB) authorizing the performance of scheduled air transportation over specified routes. Data for supplemental, commuter, intra-state, and foreign-flag air carriers are not included in this publication.

SOURCE OF DATA

The data in this publication are compiled from information reported quarterly to the CAB by the certificated route air carriers on Schedule T-3(a)(b)(c), Airport Activity Statistics of CAB Form 41, Uniform System of Accounts and Reports For Certificated Air Carriers.

PRESENTATION OF DATA

The data in this publication are presented in seven tables. The first two tables contain summary data by type of operation and type of service for carrier groups and individual air carriers and summary figures by area, State, and Country. Tables 3, 4, and 5 show activity in air carrier system operations at large, medium, and small air traffic hubs. The last two tables in the publication present detailed statistics by community and airport. In addition, the last table has a presentation of total aircraft departures performed by specific aircraft type. *In this table, an asterisk printed to the left of the aircraft designation denotes that the statistics shown relate to all-cargo service.*

In Tables 6 and 7, each community is listed under the State in which it is located without regard to the location of the airport. Cincinnati, Ohio, for example, is shown under Ohio although the Greater Cincinnati Airport is located at Covington, Kentucky. An exception to this policy occurs in those cases where a hyphenated point shown in a Certificate of Public Convenience and Necessity is served by a single airport and a State line separates the communities named. In those cases the data are listed under the State in which the airport serving the communities is located. For example, Quincy, Illinois/Hannibal, Missouri, is a hyphenated point. Since the airport is located in Quincy, Illinois, the data for both communities are shown under that city and State. In this publication, some community groupings have been made in accordance with the Federal Aviation Administration's concept of the air traffic hub structure. In this regard, single certificated points or hyphenated points that are in Standard Metropolitan Statistical Areas (SMSA) are listed under the SMSA regardless of the way the CAB Certificate is written or of the location of the airport. (See AIR TRAFFIC HUBS.)

To facilitate the location of hyphenated and combined points, there is a list at the end of this section (page vii) which cross-references the cities so certificated.

CRITERIA FOR INCLUSION OF DATA

Data included for only those online airports reported on Schedule T-3 at which aircraft departures were performed in scheduled service. Data for airports that are offline for the reporting carrier are excluded. These criteria of inclusion or exclusion are applied individually to each of the four quarterly reports comprising the source of these data.

AIR TRAFFIC HUBS

The air traffic hub structure was developed by the Federal Aviation Administration and is used to measure the concentration of all civil air traffic. The hub structure is Federal Aviation Administration's (FAA) principal operations control and the fundamental control for most of the FAA's economic and operations research procedures. Within this one medium are consolidated the social and economic factors that influence a community's ability to generate air carrier or general aviation traffic.

Air traffic hubs are not airports; they are the cities and Standard Metropolitan Statistical Areas requiring aviation services. An SMSA is a county that contains at least one city of 50,000 population, or twin cities with a combined population of at least 50,000, plus any contiguous counties that are metropolitan in character and have similar economic and social relationships. These metropolitan areas constitute a primary focal point for the transportation research program of the FAA, and the analyses of individual cities within an area are treated in relationship to the entire area. In those instances where two or more individually certificated communities are located in an SMSA, those communities are grouped under the SMSA definition throughout this publication.

Individual communities fall into four hub classifications as determined by each community's percentage of the total enplaned revenue passengers in all services and all operations of U.S. certificated route air carriers within the 50 States, the District of Columbia, and other U.S. areas designated by the Federal Aviation Administration. Table 6 contains the type of hub for each community; "L" (large), "M" (medium), "S" (small), and "N" (nonhub). Classifications in this issue are based on 281,408,852 total enplaned revenue passengers.

The percentage and number of enplaned passengers in the hub classifications for 12 months ending December 31, 1980.

Hub classification	*Percent of total enplaned passengers*	*Number of enplaned passengers*
Large (L)	1.00 or more	2,814,089 or more
Medium (M)	0.25 to 0.99	703,522 to 2,814,088
Small (S)	0.05 to 0.24	140,704 to 703,521
Nonhub (N)	less than 0.05	Less than 140,703

The geographic locations of the air traffic hubs are shown in the map on page iv and the airport activity of the hubs is summarized in Tables 3, 4, and 5.

The hub tables show that for the 12-month period ending December 31, 1980, there were 142 air traffic hubs. These hubs represented 25.6 percent of the 628 certificated points in the 50 States, the District of Columbia, and other U.S. areas receiving air carrier service during the period. The dominance of the hubs in the air traffic patterns is brought out by the fact that of the 281,408,852 passenger enplanements during the period, 96.9 percent (272,737,327) were recorded at the 142 hubs, while the nonhubs accounted for only 3.1 percent (8,639,252). Of the 96.9 percent of the passenger enplanements recorded at the hubs, the 25 large hubs accounted for 70.2 percent, the 41 medium hubs accounted for 18.4 percent, and the 76 small hubs accounted for 8.3 percent. Also in the hub tables (Tables 3, 4, and 5), the percentage relationship is shown of the total enplaned passengers at the individual airports serving the large, medium, and small hubs to total enplaned passengers (281,408,852) at all the airports used in the hub classification.

GENERAL NOTES

NEW CARRIERS

New carrier statistics included in this publication.

Carrier	*First quarter included*
Aeromech [1]	September 1980
Air North	June 1980
Cascade	September 1980
Imperial	September 1980
Golden Gate [1]	June 1980
Great Northern [1]	March 1980
Mid-South	September 1980
Midway [1]	June 1980
New York Air	December 1980

[1] December 1980 quarter missing.

Carrier Data Missing

Carrier	*Quarter excluded*
Coleman	June, Sept. and Dec. 1980
Empire	June and December1980
Mississippi Valley	March 1980
Swift Aire	December 1980
Wright	December 1980
Transamerica	December 1980

NOTE

Seaboard World was acquired by Flying Tiger effective October 1980. Seaboards data in this publication reflects the first three quarters of 1980.

Republic Airlines acquired Hughes Airwest in October 1980. Hughes Airwest's corporate name was changed to Republic Airlines West, Inc. Statistics for Hughes Airwest reflect data for the first three quarters of 1980. Statistics for Republic West reflect data only for the fourth quarter of 1980. Republic Airlines reported their data separately.

STRIKE DATA

Altair—4/13/80 to 8/18/80. Resumed operations 9/15/80.

Capital—10/9/80 to 10/10/80. Resumed operations 10/12/80.

Continental—12/5/80 to 12/20/80. Resumed operations 12/21/80.

Eastern—6/2/80 to 7/31/80. Resumed operations 8/1/80.

Ozark—5/6/80 to 6/1/80. Resumed operations 6/2/80.

Pacific Southwest—9/25/80 to 11/15/80. Resumed operations 11/16/80.

Southwest—1/13/80 to 1/18/80. Resumed operations 2/1/80.

CHANGES IN REPORTING

Effective 1/1/75, the carriers began to report off-line activity in addition to on-line activity. On-line is defined as the point(s) a carrier is authorized to serve, while off-line is everything else. This additional reporting requirement, which basically affects the nonscheduled reporting, will have no material effect on the statistics reported in this publication, since it only includes statistics for the on-line points.

In certain cases it has been a practice of carriers to reflect certain technical stops and diversions associated with scheduled service as on-line operations. In such cases operations to these points will be reflected in the publication, whereas when such service is reported as off-line it is excluded.

---

* In some tabulations in this publication, information is presented by carrier groups. Data shown in Table 1 for an individual carrier appear within the appropriate carrier group. The key numbers below indicate the carrier group for the individual carriers in the above code list:

1. Trunk carrier
2. Local service carrier
3. Helicopter carrier
4. Intra-Alaska carrier
5. Intra-Hawaii carrier
6. Other carrier
7. Regional
8. All-cargo carrier

[1] PX code used for Aspen Airways in publication, whereas "Official Airline Guide" code is now AP.

[2] See Note on page iv.

[6] Other two engine pistion.

[7] Interchange aircraft, unknown

GLOSSARY

aircraft departure. An aircraft takeoff made at an airport.

aircraft departures scheduled. The total number of departures scheduled to be made at an airport as set forth in the air carriers' published schedules.

aircraft type. A distinctive model of an aircraft as designated by the manufacturer.

airport. A landing area regularly used by aircraft for receiving or discharging passengers or cargo.

air traffic hub. Air traffic hubs are not airports; they are the cities and Standard Metropolitan Statistical Areas requiring aviation services. Communities fall into four classes as determined by each community's percentage of the total enplaned passengers in scheduled and nonscheduled service of the domestic certificated route air carriers in the 50 States, the District of Columbia, and other U.S. areas designated by the Federal Aviation Administration. Tables 3, 4, and 5, contain the type of hub for each community: "L" (large), "M" (medium), "S" (small), and "N" (nonhub).

all-cargo carrier. One of a class of air carriers holding Certificates of Public Convenience and Necessity, issued by the CAB, authorizing the performance of scheduled air freight, express, and mail transportation over specified routes, as well as the conduct of nonscheduled operations, which may include passengers.

all services. The total of scheduled and nonscheduled transport services.

cargo tons. The total of freight and express tons.

carrier group. A grouping of carriers certificated for essentially the same type of operation and having basically similar operating characteristics.

Certificate of Public Convenience and Necessity. A certificate issued to an air carrier under Section 401 of the Federal Aviation Act by the Civil Aeronautics Board authorizing the carrier to engage in air transportation.

certificated. Holding a currently valid Certificate of Public Convenience and Necessity.

certificated point. A city, place, or population center authorized to receive scheduled air service under a Certificate of Public Convenience and Necessity or under an exemption issued to an air carrier. (More than one community may be included in a certificated point, and a point may be served through more than one airport.)

certificated route air carrier. An air carrier holding a Certificate of Public Convenience and Necessity issued by the Civil Aeronautics Board to conduct scheduled services over specified routes. Certain nonscheduled or charter operations may also be conducted by these carriers.

community. A city, group of cities, or a Standard Metropolitan Statistical Area receiving scheduled air service by a certificated route air carrier.

departure. See "aircraft departure".

domestic operations. In general, operations within and between the 50 States of the United States and the District of Columbia. Includes domestic operations of the certificated trunk carriers, and the local service, helicopter, intra-Alaska, intra-Hawaii, domestic all-cargo, and other route carriers. In addition, any Canadian operations conducted on the domestic route segments of U.S. air carriers are shown as domestic operations. Local service carriers' operations into Mexico, and the Bahamas, at this time, are shown as domestic operations.

enplaned passengers. The number of revenue passengers boarding aircraft, including originating, stopover, and transfer passengers.

enplaned revenue tons of freight, express, U.S. mail, and foreign mail. The number of revenue tons of freight, express, U.S. and foreign mail loaded on an aircraft including originating and transfer tons. The tons of cargo and mail on aircraft entering a carrier's system on interchange flights are considered as enplanements at the interchange point and cargo and mail tons moving from one operation to another operation of the same carrier for which separate reports are required (reporting entity) by the CAB are considered as enplaning at the junction point.

express. Property transported by air under published air express tariffs filed with the Civil Aeronautics Board.

flight, extra section. A flight, conducted as an integral part of scheduled service, that has not been provided for in published schedules and is required for transportation of traffic that can not be accommodated on a regularly scheduled flight.

foreign mail. Mail transported from a point outside of the United States by U.S.-flag carriers for a foreign government.

freight. Property transported by air under published air freight tariffs filed with the Civil Aeronautics Board. (Excludes mail, express, and passenger baggage.)

FW 300–450 HP. Single engine fixed-wing aircraft types with 300 to 450 Maximum Except Takeoff horsepower.

FW Under 300 HP. Single engine fixed-wing aircraft types with less than 300 Maximum Except Takeoff horsepower.

helicopter carriers. Domestic certificated route air carriers primarily employing helicopter aircraft in their operations.

hub type. See "air traffic hub".

hyphenated point. Basically two or more neighboring communities which, in terms of authorization shown in a carrier's Certificate of Public Convenience and Necessity, are treated as a single community.

international operations. In general, operations outside territory of the United States, including operations between the United States and foreign countries and the United States and its territories or possessions. Includes both the combination passenger/cargo carriers and the all-cargo carriers engaged in international and territorial operations.

intra-Alaska carriers. Certificated route air carriers conducting operations primarily within the State of Alaska.

intra-Hawaii carriers. Certificated route air carriers conducting operations entirely within the State of Hawaii.

large air traffic hub. A community enplaning 1.00 percent or more of the total enplaned passengers in all services and all operations for all communities within the 50 States, the District of Columbia, and other U.S. areas designated by the Federal Aviation Administration. Also see "air traffic hub".

local service carriers. Certificated domestic route air carriers operating routes of lesser density between the smaller traffic centers and between those centers and principal centers.

medium air traffic hub. A community enplaning from 0.25 to 0.99 percent of the total enplaned passengers in all services and all operations for all communities within the 50 States, the District of Columbia, and other U.S. areas designated by the Federal Aviation Administration. Also see "air traffic hub".

nonhub. A community enplaning less than 0.05 percent of the total enplaned passengers in all services and all operations for all communities within the 50 States, the District of Columbia, and other U.S. areas designated by the Federal Aviation Administration. Also see "air traffic hub".

nonpriority U.S. mail. Mail transported by air on a space available basis.

nonscheduled service. Revenue flights that are not operated in regularly scheduled service such as charter flights.

offline airport. Installations maintained, or facilities used, by a certificated route air carrier for other than scheduled certificated air services.

online airport. Installations maintained, or facilities used, by a certificated route air carrier in conducting scheduled service.

other carriers. Carrier group comprised of Aspen Airways and Wright Air Lines.

other U.S. areas. Areas under U.S. jurisdiction, other than the 50 States and the District of Columbia, that are designated by the Federal Aviation Administration to be included in the base for air traffic hub classification computations.

percent of departures scheduled. The percent of the aircraft departures scheduled that were actually completed (performed) by the air carriers.

percent of enplanements. The percent that a community's enplaned passengers is of the total enplaned passengers in all services and all operations for all communities within the 50 States, the District of Columbia, and other U.S. areas designated by the Federal Aviation Administration. Also see "air traffic hub".

piston aircraft. An aircraft fitted with engines in which pistons, moving back and forth, work upon a crankshaft or other device to create rotational movement.

priority U.S. mail. Mail transported by air on a priority basis, includes air mail, and may include first class mail.

reporting entity. A certificated route air carrier, or an operating division or segment of the air carrier, for which separate traffic reports are required to be filed with the Civil Aeronautics Board.

revenue. Pertaining to transport activities for which remuneration is received by the carrier.

revenue passenger. Person receiving air transportation from an air carrier for which remuneration is received by the carrier. Air carrier employees or others receiving air transportation against whom token service charges are levied are considered nonrevenue passengers. Infants for whom a token fare is charged are not counted as passengers.

scheduled aircraft departures completed. The total number of aircraft departures actually performed pursuant to published schedules at each airport. Scheduled departures performed do not include departures of flights operated as extra sections to scheduled flights.

scheduled service. Transport service operated over an air carrier's certificated routes, based on published flight schedules, including extra sections.

small air traffic hub. A community enplaning from 0.05 to 0.24 percent of the total enplaned passengers in all services and all operations for all communities within the 50 States, the District of Columbia, and other U.S. areas designated by the Federal Aviation Administration. Also see "air traffic hubs".

standard metropolitan statistical area. A county that contains at least one city of 50,000 population, or twin cities with a combined population of at least 50,000, plus any contiguous counties that are metropolitan in character and have similar economic and social relationships.

total cargo and mail. The total number of enplaned revenue tons of freight, express, U.S. mail, and foreign mail.

total departures performed in all services. The total number of aircraft takeoffs made in scheduled and nonscheduled service.

total departures performed in nonscheduled service. The total number of aircraft takeoffs made in nonscheduled service.

total departures performed in scheduled service. The total number of aircraft takeoffs made in scheduled service including extra sections.

total operations. The total of all operations (domestic and international) performed by an air carrier.

total U.S. mail. The total number of enplaned revenue tons of priority and nonpriority U.S. mail.

trunk carriers. This group of carriers operates primarily within and between the 50 States of the United States over routes serving primarily the larger communities.

turbofan aircraft. Aircraft propelled by a turbojet engine whose thrust has been increased by the addition of a low-pressure compressor (fan). The turbofan engine can have an oversized low-pressure compressor at the front with part of the flow by-passing the rest of the engine (front-fan or forward-fan) or it can have a separate fan driven by a turbine stage (aft-fan).

turbojet aircraft. Aircraft propelled by jet engines incorporating a turbine-driven air compressor to take in and compress the air for the combustion of fuel, the gases of combustion (or the heated air) being used both to rotate the turbine and to create a thrust-producing jet.

turboprop aircraft. Aircraft in which the main propulsive force is supplied by a conventional propeller driven by a gas turbine. Additional propulsive force may be supplied from the discharged turbine exhaust gas.

turboshaft helicopter. A helicopter powered by one or more gas turbine engines.

type of operation. Airport activity in domestic, international, or total (system) operations.

type of service. Airport activity in scheduled, nonscheduled, or all services.

unknown aircraft type. Single or two engine piston aircraft used by Wien Air Alaska, Inc. in its intra-Alaskan operation.

NOTE: The terms in this Glossary are defined as they pertain to this publication.

TABLE 1.
SUMMARY OF AIRCRAFT DEPARTURES, ENPLANED REVENUE PASSENGERS, AND ENPLANED REVENUE TONS OF CARGO AND MAIL BY TYPE OF OPERATION, BY TYPE OF SERVICE, BY CARRIER GROUP, AND BY AIR CARRIER
